! Ensure resource hints are valid

💡 Explanation	Browser resource hints tell the browser about resources before they would be naturally discovered. Learn More .
📋 Assessment	Found 1 potentially invalid resource hints.
💬 Advice	Ensure that resource hints are valid and used correctly.

RESOURCE HINT	SOURCE	TYPE	SIZE
✅ https://cdn.replit.com	DOM	DNS-PREFETCH	
✅ https://cdnjs.cloudflare.com	DOM	DNS-PREFETCH	
❌ https://cdn.replit.com CROSSORIGIN	DOM	PRECONNECT	
❌ The connection created by this hint is not used on the page, but a connection with different CORS mode is. Consider removing the crossorigin attribute. Found a non-CORS request to 'https://cdn.replit.com/agent/bootstrap-agent-dark-theme.min.css'			
✅ https://cdnjs.cloudflare.com CROSSORIGIN	DOM	PRECONNECT	
✅ https://cdn.jsdelivr.net CROSSORIGIN	DOM	PRECONNECT	

i Don't load oversized web fonts

💡 Explanation	Unnecessarily large fonts increase the time until text renders and compete for bandwidth with other early resources.
📋 Assessment	Found 1 large fonts with a total size of 147 KB.

 Advice

Load font files no larger than 50 to 100 kilobytes.
